

Maikon Camilo Gosch

Mid-Level Front-End Developer

+55 (47) 98421-6670 · maikongosch@gmail.com · Joinville, SC, Brazil · [linkedin.com/in/maikon-camilo](https://www.linkedin.com/in/maikon-camilo)

Summary

Front-end engineer with 7+ years of experience building scalable web and mobile applications with React, Next.js, Vue, Flutter and React Native. Experienced working with international teams on fintech, healthtech and SaaS products. I have led a team of four developers, mentoring teammates, reviewing production code and taking part in architecture decisions. Passionate about clean architecture, performance and interfaces that are easy to maintain.

Experience

Front-End Developer

Apr 2024 - 2026

[Hyperlocal](#) · São Paulo, BR

- I maintain and evolve a React application in production, ensuring stability, performance and continuous delivery of new features.
- Led the implementation of Multi-Factor Authentication (MFA) with AWS Amplify, defining the authentication flows and the integration with the existing user base to meet security compliance requirements.
- Started rebuilding a legacy system in Next.js on top of a shared design system, standardizing components and reducing the effort required to build new screens.

Front-End Developer · Consultancy

May 2022 - Mar 2024

[Bitwise Technology](#) · São Paulo, BR

- Worked as a front-end consultant for healthtech and fintech clients, delivering complete projects independently, from layout to API integration.
- Adapted to each client's stack, building interfaces with Vue, React, Next, Angular and Flutter for products used by companies in several countries.
- Was the sole front-end developer on several of these projects, owning the interface architecture and communicating directly with the client.

Full-stack Developer

Oct 2020 - Jul 2021

[Voyager Portal](#) · Houston, US

- Developed and maintained applications with Vue on the front end and Adonis (Node.js) on the back end, using MySQL as the database, in a distributed team working entirely in English.
- Built new interfaces and implemented APIs according to the product's operational workflows, fixing bugs and adjusting business rules alongside the product team.

Front-End Lead

May 2018 - Sep 2020

[RotaExata](#) · Joinville, BR

- Promoted to front-end team lead, responsible for four developers: code reviews, technical guidance and communicating progress and status to stakeholders.
- Started out building web applications with jQuery and PHP and moved on to a new product built with Vue and Vuetify, following the transition from the legacy codebase to a component-based architecture.
- Proposed architecture improvements adopted by the team, standardizing project structure and the code review process.

Education

Systems Analysis and Development - Technologist

2017 - 2020

[Unopar](#) · Joinville, Brazil

Projects

ReplicaDex · replicadex.com.br

Web platform for the competitive Pokémon community: a database of community-shared teams ready to copy, search by Pokémon, archetype or creator, and a Pokédex with stats, movesets, items and natures ranked by real tournament usage. Built with React 19, Vite, Tailwind CSS and TanStack Query, with route-level code splitting, schema.org structured data for SEO and deployment on Vercel.

Parse Academy · parseacademy.com

Performance analysis tool for World of Warcraft: from a Warcraft Logs URL it generates fight summaries, DPS/HPS rankings, death recaps, player awards and shareable result pages. React 18 with Vite, Tailwind CSS and TanStack Query, serverless functions on Vercel integrating the Warcraft Logs and Raider.IO APIs, dynamic share image (OG) generation and an installable mobile PWA.

Skills

Front-end	React · Next.js · Vue.js · Angular.js · Tailwind CSS · Vite · TanStack Query
Mobile	React Native · Flutter · PWA
Testing	Jest · Cypress
Back-end & data	Node.js (Adonis) · PHP · MySQL · REST APIs
Infra & deploy	CI/CD · AWS Amplify · GCP · Vercel
Practices	Code review · Mentoring · Technical leadership · Design systems

Languages

Portuguese (native) · English (fluent, EF SET C1) · Spanish (intermediate)

Certifications

- EF SET English Certificate 69/100 (C1 Advanced)
- Modern React with Redux course
- Wordpress: Complete Course to Create Responsive Themes

Interests

Outside of work, I enjoy gaming as a way to relax, stay creative and connect with communities, in both competitive and casual play. I also dedicate time to personal projects, mostly related to web development, where I like trying out new tools, sharpening my skills and turning ideas into something real (almost always about games).
